

Viterra Electronic Funds Transfer Enrollment Application and Authorization

Viterra has two ways to provide payment to our customers for grain delivered to our primary elevators and processing plants. The physical Cash Ticket (CT) and Electronic Funds Transfer (EFT).

As a Viterra customer, I want the option to receive payment via EFT.

The following is required to get set-up to have funds deposited to my account at my financial institution:

- Copy of a void check (cheque) or a document generated by the financial institution with bank and account information.
- E mail address to receive grain settlement advice for all EFT generated payments (paper copies of the settlement will not be printed for EFT payments).
- E Mail address to receive confirmation from Viterra’s bank that the process to distribute the funds through the clearing and settlement system has begun (funds may take up to two business days to be deposited in my account).

By signing this EFT Request Form and opting to receive funds via EFT, I hereby acknowledges that a delay of up to seven business days will be required to process any EFT (the “Lag Period”), prior to the transfer of funds to my account. In the event that I wish to avoid the Lag Period, then payment can be made by Cash Ticket (CT), upon request.
