Management's Responsibility

To the Shareholders of CMI Terminal Ltd.:

Management is responsible for the preparation and presentation of the accompanying consolidated financial statements, including responsibility for significant accounting judgments and estimates in accordance with International Financial Reporting Standards and ensuring that all information in the annual report is consistent with the consolidated statements. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the consolidated financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of consolidated financial statements.

The Board of Directors and Audit Committee are composed entirely of Directors who are neither management nor employees of the Company. The Committee is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Committee fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors. The Committee is also responsible for recommending the appointment of the Company's external auditors.

MNP LLP is appointed by the shareholders to audit the consolidated financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Committee and management to discuss their audit findings.

Independent Auditors' Report

To the Shareholders of CMI Terminal Ltd.:

We have audited the accompanying consolidated financial statements of CMI Terminal Ltd. and its subsidiary which comprise the consolidated statement of financial position as at December 31, 2014, October 31, 2013 and November 1, 2012 and the consolidated statements of comprehensive income, changes in equity and cash flows for the 14 month period ended December 31, 2014 and the year ended October 31, 2013 and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform an audit to obtain reasonable assurance whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation.

We believe the audit evidence obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of CMI Terminal Ltd. and its subsidiary as at December 31, 2014, October 31, 2013 and November 1, 2012 and their financial performance and their cash flows for the 14 month period ended December 31, 2014 and the year ended October 31, 2013 in accordance with International Financial Reporting Standards.

Comparative Information

Without modifying our opinion, we draw your attention to Note 3, which indicates that the Company has adopted IFRS 11, Joint Arrangements, and as a result, has restated the comparative figures for the 12 months ended October 31, 2013 and for the opening balances as at November 1, 2012.

The accompanying notes are an integral part of these consolidated financial statements

1. Reporting entity and description of business

CMI Terminal Ltd. ("the Company") was incorporated on June 4, 1998 under the laws of the Province of Saskatchewan.

The Company is domiciled near Naicam, Saskatchewan, Canada.

The Company was formed for the purpose of entering into a joint venture agreement with Viterra Inc. ("Viterra Inc.") in constructing and operating an inland grain terminal near Naicam, Saskatchewan. The Joint Venture's name is CMI Terminal Joint Venture. The Joint Venture partners, CMI Terminal Ltd. and Viterra Inc., are 50% participants in the Joint Venture.

Under the terms of the Agreement, all shipments from the Joint Venture facility are exclusively consigned to Viterra Inc. The ownership of grain transfers directly from each producer to Viterra Inc. at time of purchase. The Company, therefore, does not record grain inventory in its consolidated accounting records.

In 2005, the Company, through the Joint Venture operations, became involved in the crop production services business ("CPS").

On May 15, 2013, the Company incorporated CMI Ag Ltd. for purposes of carrying on the crop production services business. As of October 11, 2013, CMI Terminal Ltd. withdrew its portion of equity related to their 50% share of the CPS assets from CMI Terminal Joint Venture and purchased the remaining 50% share of those assets from Viterra Inc. at their fair market value. The wholly owned subsidiary (CMI Ag Ltd.) carries on the operations of the CPS business and the financial information has been consolidated into the financial statements of CMI Terminal Ltd.

The address of the Company's registered office is P.O. Box 43, Naicam, Saskatchewan, S0K 2Z0.

The consolidated financial statements were approved by those charged with governance and authorized for issue on March 19, 2015.

Due to the nature of the operations, the Company experiences effects of seasonality. The business is affected by changes in the agriculture sector, resulting from poor crop yields or fluctuating commodity market prices. The Company's second and third quarters have the highest amount of sales given the larger amount of crop input sales during these time frames.

The Company has changed its year-end from October 31 to December 31 to coincide with supplier rebates that are received by its subsidiary CMI Ag Ltd. Therefore, these financial statements report the 14 month period ended December 31, 2014. The comparative figures presented are for the 12 month period ended October 31, 2013 and therefore are not entirely comparable.

2. Basis of preparation

Statement of compliance

These consolidated financial statements have been prepared in accordance with accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC") in effect as at December 31, 2014.

The accounting policies and methods of application applied by the Company in these consolidated financial statements are the same as those applied in the Company's most recent annual consolidated financial statements as at October 31, 2013, except for those policies which have changed as a result of the adoption of new and amended IFRS pronouncements effective November 1, 2013. The effects of the adoption of new and amended IFRS pronouncements have been disclosed in Note 3 of these consolidated financial statements.

Basis of measurement

Except for certain financial instruments measured at fair value, the consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments measured at fair value. The principal accounting policies are set out in Note 5.0.

Functional currency

The consolidated financial statements are presented in Canadian dollars, which is the Company's functional currency.

3. Adoption of new and amended IFRS pronouncements

The following standards have been published and are mandatory for the Company's annual accounting periods beginning on or after November 1, 2013. Unless otherwise disclosed, the adoption of these new standards did not have a material impact on the consolidated financial statements.

IFRS 10 – consolidated financial statements

This IFRS deals with the requirements and accounting practices to consolidating investments where they are deemed to have control. This section indicates that a parent company must prepare consolidated financial statements using uniform accounting policies for like transactions and other events. The Company owns 100% of the shares of CMI Ag Ltd., as such, the financial statements have been consolidated using similar accounting standards to incorporate the assets, liabilities, income and expenses of CMI Ag Ltd. This section is effective for annual periods beginning on or after January 1, 2013. Adoption of this section had no impact on the consolidated financial statements.

IFRS 11 – joint arrangements

This section deals with joint arrangements whereby two or more parties have joint control. CMI Terminal Ltd. jointly controls CMI Joint Venture, through a joint venture agreement with Viterra Inc. As such, the requirement to adopt this section indicates that the Joint Venture must be accounted for using the equity method in accordance with *IAS 28 Investments in Associates and Joint Ventures.* This IFRS applies for annual periods beginning on or after January 1, 2013, thus, the Company has adopted this section beginning with its fiscal period ending December 31, 2014. As required by this IFRS, the Company must recognize its investment in the Joint Venture as at the beginning of the immediately preceding period using the equity method, rather than the proportionate consolidation method. The Company's comparative figures have been restated to conform to the required accounting standard. The effects on the consolidated statement of financial position, statement of comprehensive income and statement of cash flow are presented in Note 12. The required disclosure pertaining to a breakdown of the assets and liabilities that have been aggregated into a single line investment balance is disclosed in Note 13.0.

IFRS 12 – disclosures of interest in other entities

This section contains enhanced disclosure requirements for interests in other entities, including subsidiaries and joint arrangements, among others. It replaces the disclosure requirements in existing IAS 27 – consolidated and separate financial statements, IAS 28 investments in associates and IAS 31 interests in joint ventures. This standard effects only disclosure, and is effective for annual periods beginning on or after January 1, 2013.

IFRS 13 – fair value measurements

This section redefines fair value to emphasize that it is a market-based measurement, not an entity-specific measurement. It also provides a single framework for measuring fair value and applies, with limited exception, when another standard permits or requires fair value measurement. IFRS 13 requires specific disclosures about fair value measurement. This standard is effective for annual periods beginning on or after January 1, 2013.

4. Significant accounting judgments, estimates and assumptions

The preparation of the Company's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the reporting date. However, uncertainties about these assumptions and estimates could result in outcomes that would require a material adjustment to the carrying amount of the asset or liability affected in the future.

Significant judgments

Determining cash generating units ("CGU's)
For the purpose of assessing impairment of tangible and intangible assets, assets are grouped at the lowest level of separately identified cash flows which make up the CGU. Determination of what constitutes a CGU is subject to management judgment. The asset composition of a CGU can directly impact the recoverability of assets included within the CGU. In assessing the recoverability of tangible and intangible assets, each CGU's carrying value is compared to the greater of its fair value less costs to sell and value in use.

4. Significant accounting judgments, estimates and assumptions *(Continued from previous page)*

Significant estimates

Accounts receivable are stated after evaluation as to their collectability and an appropriate allowance for doubtful accounts is provided where considered necessary.

Inventory is valued using the weighted average method. Inventory values are adjusted as required if values decline during the period. Adjustments and allowances for spoiled or damaged inventory as needed throughout the year.

Depreciation is based on the estimated useful lives of property, plant and equipment.

The calculation of deferred income tax is based on assumptions, which are subject to uncertainty as to timing and which tax rates are expected to apply when temporary differences reverse. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements from changes in such estimates in future years could be significant.

The current portion of long-term debt is calculated based upon repayment terms, and interest rates in effect at year-end.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

5. Summary of significant accounting policies

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards. The significant accounting policies are as follows:

Basis of consolidation

These consolidated financial statements include the accounts of CMI Terminal Ltd., and the financial accounts of its wholly owned subsidiary, CMI Ag Ltd. Inter-entity balances and transactions are eliminated. Subsidiaries are entities controlled by the Company. Control is achieved where the Company is exposed, or has rights, to variable returns from its involvement with the investee and it has the ability to affect those returns through its power over the investee. In assessing control, only rights which give the Company the current ability to direct the relevant activities and that the Company has the practical ability to exercise, is considered.

The results of subsidiaries acquired or disposed of during the period are included in these consolidated financial statements from the effective date of acquisition, or up to the effective date of disposal, as appropriate.

The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances.

Any balances, unrealized gains and losses, or income and expenses arising from intra-Company transactions, are eliminated upon consolidation. Unrealized gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Company’s interest in the investee.

Cash and cash equivalents

Cash and cash equivalents include cash on hand and short-term highly liquid investments with original maturities of three months or less that are readily convertible into known amounts of cash, and which are subject to an insignificant risk of change in value.

5. Summary of significant accounting policies *(Continued from previous page)*

Property, plant and equipment

Property, plant and equipment is stated at cost, less accumulated depreciation and impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

The cost of major inspections, overhauls and replacement parts of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The cost of day-to-day maintenance of property, plant and equipment is recognized immediately in profit or loss as incurred.

All assets having limited useful lives are depreciated using the straight-line method over their estimated useful lives.

Land has an unlimited useful life and is, therefore, not depreciated.

Assets are depreciated from the date of acquisition or at the time they become available for use, if these times differ. Internally constructed assets are depreciated from the time the asset is available for use.

The methods of depreciation, depreciation rates, and useful life applicable for each class of asset during the current and comparative periods are as follows:

	Method	Rate / Years
Building	Straight line	5 – 40 years
Equipment	Straight line	3 – 40 years
CPS equipment	Straight line	5 – 40 years
NH3 equipment	Straight line	10 years
Vehicles	Straight line	3 – 10 years
Computer equipment	Straight line	5 years

The useful life and depreciation method applied to each class of assets are reassessed at each reporting date.

Impairment of non-financial assets

At the end of each reporting date, the Company assesses whether there are any indicators of impairment for all non-financial assets. Non-financial assets that have an indefinite useful life, or are not subject to depreciation, are tested annually for impairment. Other non-financial assets are tested for impairment if there are indicators that their carrying amounts may not be recoverable.

At the end of each reporting period, the Company reviews the carrying amounts of its property, plant and equipment, and tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating units ("CGU") to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual CGU's, or otherwise they are allocated to the smallest group of CGU's for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or CGU is estimated to be less than its carrying amount, the carrying amount of the asset or CGU is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or CGU in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

5. Summary of significant accounting policies *(Continued from previous page)*

Impairment of financial assets

Management determines when a financial asset is impaired in accordance with IAS 39 *Financial Instruments: Recognition and Measurement*. This determination requires significant judgment. Management evaluates the duration and extent to which the fair value of an investment is less than its cost; and the financial health of, and short-term business outlook for the investee, including factors such as industry and sector performance, changes in technology and operational and financing cash flow.

When the fair value declines, management makes assumptions about the decline in value to determine if it is an impairment to be recognized in profit or loss.

At year-end, no impairment losses have been recognized (2013 - $nil).

Borrowing costs

Borrowing costs are expensed as incurred except to the extent that they are directly attributable to the construction of a qualifying asset. Qualifying assets are assets that necessarily take a substantial period of time to reach the stage of their intended use or sale. Borrowing costs are capitalized into the cost of qualifying assets until they are ready for their intended use or sale.

When the Company borrows funds specifically for the construction of a qualifying asset, the borrowing costs capitalized are the actual borrowing costs incurred on that borrowing, net of any interest earned on those borrowings. When funds borrowed for general purposes are used for the construction of a qualifying asset, borrowing costs are capitalized using a weighted average of the borrowing costs. All other borrowing costs are recognized in profit and loss as incurred.

Joint venture

A joint venture consists of a joint arrangement where venturers do not have rights to individual assets or obligations for expenses of the joint venture; rather each venturer is entitled to a share of the outcome of the activities of the joint venture.

The Company reports its interests in joint ventures using the equity method. Therefore, the statement of financial position shows the total investment in the joint venture and the statement of comprehensive income includes the 50% share of income from the joint venture.

The financial statements of the Joint Venture are prepared for the same reporting period as the Company.

Revenue recognition

Revenue is recognized when it is probable that the economic benefits associated with a transaction will flow to the Company, when the significant risks and rewards of ownership of the goods have been transferred to the buyer and when the amount of revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, excluding trade discounts, volume rebates, and amounts collected on behalf of third parties.

Grain handling and related revenue is recognized upon grain settlement. Crop production services revenue is recognized when product is delivered to the customer.

Provisions

A provision is recognized, if, as a result of a past event, the Company has a legal or constructive obligation that can be estimated reliably and it is probable that a future outflow of economic benefits will be required to settle the obligation. The timing or amount of the outflow may still be uncertain.

Provisions are measured by discounting the expected future cash flows that reflect current market assessments of the time value of money and specific risks of the obligation. Where there are a number of obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. All provisions are reviewed at each reporting date and adjusted accordingly to reflect the current best estimate.

5. Summary of significant accounting policies *(Continued from previous page)*

Inventory

Inventories are valued at the lower of cost and net realizable value. Cost is determined by the weighted average method. Cost comprises all costs of purchases, costs of conversion and other costs incurred in bringing inventories to their present location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling costs.

Contingent assets and liabilities

All contingent liabilities are continually reviewed to determine whether an outflow of economic benefits has become probable. Where a contingent liability becomes probable, a provision is recognized in the period in which the change in probability occurs. If at the end of the reporting period it is no longer probable that an outflow of economic benefits will be required to settle the obligation, the provision is reversed.

All contingent assets are continually reviewed to ensure that the circumstances are appropriately reflected in the consolidated financial statements. Where the realization of an inflow of economic benefits with respect to a contingent asset becomes virtually certain, the asset and the related income are recognized.

Income tax

Taxation on the profit or loss for the year is comprised of current and deferred tax.

Taxation is recognized in the statement of comprehensive income except to the extent that it relates to items recognized directly in equity, in which case the tax is recognized in equity.

Current tax is the expected tax payable on the taxable income for the year using rates enacted or substantially enacted at the year end, and includes any adjustments to tax payable in respect of previous years.

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax basis. Deferred tax assets and liabilities are calculated at tax rates that are expected to apply to their respective period of realization, provided they are enacted or substantially enacted by the end of the reporting period. Deferred tax assets are recognized to the extent that it is probable that they will be able to be utilized against future taxable income. Deferred tax assets are reviewed at each balance sheet date and adjusted to the extent that it is no longer probable that the related tax benefit will be realized.

Earnings per share

Basic earnings per share is calculated by dividing earnings available to common shareholders by the weighted average number of common shares. There are no dilutive instruments outstanding, such as warrants, rights or future conversion options of shares as at period-end.

Financial instruments

Financial assets and financial liabilities are initially measured at fair value. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities other than financial assets and financial liabilities at fair value through profit or loss (“FVTPL”) are added to, or deducted from, the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss.

Financial assets at fair value through profit or loss

The Company has classified cash and cash equivalents at fair value through profit or loss. This is in accordance with the Company’s risk management strategy since the individual instruments share the same risk exposure. Transactions to purchase or sell these items are recorded on the settlement date.

Financial instruments at fair value through profit or loss are subsequently measured at their fair value.

5. Summary of significant accounting policies *(Continued from previous page)*

Loans and receivables

The Company has classified accounts receivable, and amounts due from related parties as loans and receivables.

Loans and receivables are subsequently measured at their amortized cost. Amortized cost is the amount at which the financial asset is measured at initial recognition less principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and less any reduction for impairment or collectability.

Financial liabilities at amortized cost

The Company has classified accounts payable and accruals, amounts due to related parties, bank indebtedness, and long-term debt as financial liabilities measured at amortized cost.

Financial liabilities measured at amortized cost are subsequently measured at amortized cost. Under this method, estimated future cash payments are exactly discounted over the liability's expected life, or other appropriate period, to its net carrying value. Amortized cost is the amount at which the financial liability is measured at initial recognition less principal repayments, and plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount.

Fair value measurements

The Company classifies fair value measurements recognized in the statement of financial position using a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

- Level 1: Quoted prices (unadjusted) are available in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices in active markets that are observable for the asset or liability, either directly or indirectly; and
- Level 3: Unobservable inputs in which there is little or no market data, which require the Company to develop its own assumptions.

Fair value measurements are classified in the fair value hierarchy based on the lowest level input that is significant to that fair value measurement. This assessment requires judgment, considering factors specific to an asset or a liability and may affect placement within the fair value hierarchy.

Standards issued but not yet effective

The Company has not yet applied the following new standards, interpretations and amendments to standards that have been issued as a December 31, 2014 but are not yet effective. Unless otherwise stated, the Company does not plan to early adopt any of these new or amended standards and interpretations.

Financial instruments

IFRS 9 was issued in November 2009 and subsequently amended as part of an ongoing project to replace IAS 39 *Financial instruments: Recognition and measurement*. The standard requires classification of financial assets into two measurement categories based on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. The categories are those measured at fair value and those measured at amortized cost. The classification and measurement of financial liabilities is primary unchanged from IAS 39, other than the fair value measurement option which now addresses an entity's own credit risk. Additional amendments are expected with respect to de-recognition of financial instruments, impairment and hedge accounting. IFRS 9 is effective for annual periods beginning on or after January 1, 2015. The Company has not yet determined the impact of this amendment on its consolidated financial statements.

In November 2013, the IASD amended IFRS 9. The amendments result in significant changes to hedge accounting. In addition, an entity can now apply the "own credit requirement" in isolation without the need to change any other accounting for financial instruments. The mandatory effective date has been deferred to annual periods beginning on or after January 1, 2018. The Company has not yet determined the impact of this amendment on its financial statements.

5. Summary of significant accounting policies *(Continued from previous page)*

IAS 16 Property, plant and equipment and IAS 38 intangible assets

The amendments to IAS 16 and IAS 38, issued in December 2013, clarify how an entity calculates the gross carrying amount and accumulated depreciation when a revaluation is performed. The amendments are effective for annual periods beginning on or after July 1, 2014. The Company is currently assessing the impact of this amendment on its financial statements.

Standards issued but not yet effective

IAS 24 related party disclosures

The amendments to IAS 24, issued in December 2013, clarify that a management entity, or any member of a group of which it is a part, that provides key management services to a reporting entity, or its parent, is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. This replaces the more detailed disclosure by category required for other key management personnel compensation. The amendments will only affect disclosure and are effective for annual periods beginning on or after July 1, 2014.

6. Accounts receivable

	December 31 2014	October 31 2013	November 1 2012
Trade receivables	**315,441**	253,625	42
Goods and Services Tax receivable	**5,226**	-	
	320,667	253,625	42

7. Inventory

	December 31 2014	October 31 2013
Chemical	789,259	154,393
Fertilizer	456,258	262,058
Seed	992,355	47,650
Agriculture equipment	760	55,704
NH3	157,094	97,016
Total inventory	**2,395,726**	616,821

The cost of inventories recognized as an expense and included in cost of sales amounts to 10,945,126 (2013 - $1,160,008).

Note that comparative balances as at November 1, 2012 have not been disclosed as there was no inventory held by the Company at that time.

8. Property, plant and equipment

During the year ended October 31, 2013, the Company purchased Viterra Inc.'s 50% share of the CPS division in the Joint Venture. Under the previous standards, CMI recorded its 50% of the assets in the financial statement using proportionate consolidation. Due to the adoption of IFRS 11, the Company now records all assets from the Joint Venture using the equity method. The total value of the assets recorded in the table above for October 31, 2013 reflect the dollar amount of assets owned at the end of that period, and do not reflect Joint Venture assets.

9. Bank indebtedness

Bank indebtedness includes an operating loan in the amount of $217,000 (October 31, 2013 - $nil) and bearing interest at prime plus 0.25%. The Company is subject to certain borrowing conditions and debt covenants, relating to having sufficient levels of inventory and accounts receivable. The Company is in compliance with all covenants at the end of December 31, 2014. Security on the operating line is a general security agreement. Bank indebtedness is authorized to a maximum of $5,000,000 (October 31, 2013 - $5,000,000), and is repayable on demand.

10. Long-term debt

	December 31 2014	October 31 2013
Term loan repayable in monthly payments of $12,234 plus interest. The loan bears interest at prime plus 0.5% (3.50% at Dec. 31, 2014). The loan is secured by a general security agreement. The current term matures in 2016.	**721,750**	-
Term loan payable in monthly instalments of $4,193 plus interest. The loan bears interest at prime plus 0.5% (3.50% at Dec. 31, 2014). The loan is secured by a general security agreement. The current term matures in 2016.	**163,531**	222,233
	885,281	222,233
Less: current portion	**197,124**	50,352
	688,157	171,881

Principal repayments on long-term debt in each of the next four years, assuming long-term debt subject to refinancing is renewed, are estimated as follows:

2015	197,124
2016	197,124
2017	197,124
2018	197,124
Thereafter	96,785
Total	885,281

Long-term debt is subject to certain financial covenants with respect to current ratio and tangible net worth. As at December 31, 2014, the Company was in compliance with all such covenants.

11. Related party transactions

The Company owns all property, plant and equipment in relation to its subsidiary's operations. A rental agreement and usage charge has been agreed upon between the two companies. During the 14 month period ended December 31, 2014, rent in the amount of $380,135 was charged in relation to this agreement (12 months ended October 31, 2013 - $40,000).

During the 14 months ended December 31, 2014, payroll expenses totalling $1,840,249 (October 31, 2013 - $45,790) were paid by CMI Terminal Ltd., with $1,024,927 being reimbursed by CMI Joint Venture, and $815,322 being reimbursed by CMI Ag Ltd.

During the 14 months ended December 31, 2014, other operating and administrative expenses totalling $10,431 were paid by the Joint Venture and reimbursed by CMI Terminal Ltd. During the same period, CMI Terminal Ltd. purchased three vehicles from the Joint Venture in the amount of $104,218.

The transactions are in the normal course of operations, and are measured at the exchange amount, which approximates fair value and is the amount of consideration established and agreed upon by the related parties.

All intercompany transactions have been eliminated upon consolidation between CMI Terminal Ltd. and CMI Ag Ltd.

Of these amounts, the following balances are recorded on the consolidated statement of financial position:

	December 31 2014	October 31 2013	November 1 2012
Due from CMI Joint Venture	135,294	48,505	-
Due to CMI Joint Venture	178,488	60,549	-

Key management personnel

Key management personnel consists of Directors, the General Manager, the Controller, and the Manager of Ag Sales and Services.

Compensation of directors and key management personnel

Compensation shown includes (where applicable) wages and salaries, paid annual leave and paid sick leave, bonuses and value of fringe benefits received, but excludes out of pocket reimbursements.

Total compensation paid during the 14 month period ended December 31, 2014, to key management personnel, totalled $441,299 (12 months ended October 31, 2013 - $347,640).

Other transactions with directors

During the 14 month period ended December 31, 2014, the Company made $562,116 of sales to directors or corporations controlled by directors (October 31, 2013 - $354,703). The sales and purchases were made on the same terms and conditions available to all other customers. Of these amounts, $nil is receivable at December 31, 2014 (October 31, 2013 - $nil).

12. Restatement of investment in CMI Joint Venture

As described in Note 3, the Company has applied the changed IFRS standard, IFRS 11, retrospectively. The revised standard requires the Company to account for its investment in CMI Joint Venture using the equity method, rather than the proportionate consolidation method previously applied. The impact is as follows:

14. Financial instruments

The Company, as part of its operations, carries a number of financial instruments. It is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments except as otherwise disclosed.

Fair value hierarchy

Cash and cash equivalents valued at fair value on the statement of financial position are classified in the fair value hierarchy as Level 1.

Financial instruments carrying values and fair values

The carrying amounts of accounts receivable, accounts payable and accruals, bank indebtedness, and amounts due to and from related parties approximate their fair values due to the short-term maturities of these items. The carrying amount of the Company's long-term debt approximates its fair value, as current interest rates are not significantly different from the terms of these loans.

Fair values are based on management's best estimates after consideration of current market conditions. The estimates are subjective and involve considerable judgment, and as such are not necessarily indicative of the amounts that the Company may incur in actual market transactions.

Risk management policy

The Company is exposed to a variety of financial risks as part of its operations, including the following:

- interest rate
- price
- credit
- liquidity
- foreign exchange

The Company, as part of operations, has established avoidance of undue concentrations of risk as risk management objectives. In seeking to meet these objectives, the Company follows a risk management policy approved by its Board of Directors.

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. Changes in market interest rates may have an effect on the cash flows associated with some financial assets and liabilities, known as cash flow risk, and on the fair value of other financial assets or liabilities, known as price risk. In seeking to minimize the risks from interest rate fluctuations, the Company manages exposure through minimizing exposure to long-term financial instruments subject to interest rate risk and obtaining long-term debt with fixed rates. The Company does not speculate on interest rates.

The Company is exposed to interest rate risks with respect to its long-term debt and bank indebtedness. A 1.0% increase in interest rates relating to the Company’s long-term debt would reduce comprehensive income by $8,852. A 1.0% increase in interest rates relating to the Company’s bank indebtedness would reduce the Company’s comprehensive income by $9,222.

Price risk

Price risk is the risk that the fair value, or future cash flows of a financial instrument, will fluctuate because of changes in market prices (other than those arising from interest rate risk or foreign currency risk), whether those changes are caused by factors specific to the individual financial instruments, or its issuer, or factors affecting all similar financial instruments traded in the market. The Company enters into transactions to purchase crop production products, for which the market prices fluctuate. The nature of the Company’s activities exposes it to risks of changes in commodity prices related to crop inputs that may occur between the time products are received from the supplier and the actual date of sale to customers. The Company quotes spring prices to many of its customers, which may or may not be higher than the price at which they purchased it for. To mitigate a portion of this risk, the Company enters into contracts with the supplier to purchase the product at a specified price, which is less than the price quoted.

14. Financial instruments *(Continued from previous page)*

Credit risk

Credit risk is the risk of a financial loss to the Company if a customer or counter party to a financial instrument fails to meet its contractual obligations. Credit concentration exists relating to trade accounts receivable as the Company's sales are concentrated in the agricultural sector. The Company's sales are spread within a large market and it is management's belief that they are not subject to a large amount of credit risk. At the end of the 14 months period ended, credit risk was concentrated solely with one customer making up 82% of the accounts receivable balance (2013 – no large balance over 10%).

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivery of cash or another financial asset. The Company enters into transactions to purchase goods and services on credit, borrow funds from financial institutions or other creditors, and lease office equipment from various creditors for which repayment is required at various maturity dates. Liquidity risk is measured by reviewing the Company's future net cash flows for the possibility of negative cash flow. Accounts payable and accruals are current and scheduled for payment within the next fiscal year. The Company`s outstanding bank indebtedness is due on demand and therefore there is no maturing date. The contractual maturities of long-term debt are disclosed in Note 10.0.

Foreign exchange risk

Foreign exchange risk is the risk that the value of the Canadian dollar changes in relation to other currencies. Foreign exchange risk arises from purchase transactions, as well as recognized financial assets and liabilities denominated in foreign currencies. The Company does not hold any financial assets or liabilities in foreign currencies, and foreign exchange risk is limited to a small number of asset purchases which are recorded at the spot rate at the time the Company acquires ownership of the asset.

15. Share capital

	December 31 2014	October 31 2013	November 1 2012
Authorized			
Common shares			
Unlimited number of Class A, voting common shares which may be issued in series.			
Unlimited number of Class B, non-voting shares which may be issued in series. The Class B shares may be converted into Class A Series 1 shares as follows: (i) Class A Shareholders may convert their Class B Series 1 shares for Class A Series 1 shares on a one-to-one basis, and (ii) Class B (only) shareholders may convert their Class B Series 1 shares to Class A Series 1 shares on a one-to-one basis provided that such conversion rights may only be exercised in lots of 10 Class B Series 1 shares.			
Preferred shares			
Unlimited number of Class C, non-voting preferred shares, redeemable by the Company, retractable by the holder.			
Unlimited number of Class D, non-voting preferred shares, redeemable by the Company, retractable by the holder. Each Class D share may be converted into three Class A Series 1 shares at the option of the Company.			
Issued			
Common shares			
20,980 Class A common shares (20,980 at Oct 31, 2013)	**497,673**	497,673	875,854

Common shares	**#**	**$**
Balance November 1, 2012	22,050	$875,854
Capital distributions	-	(335,680)
Share redemptions	(1,070)	(42,501)
Balance October 31, 2013	20,980	497,673
Balance December 31, 2014	**20,980**	**497,673**

There have been no share transactions on 2014.

16. Income taxes

	December 31 2014	October 31 2013	November 1 2012
Deferred income tax assets:			
Property, plant and equipment	**4,342,139**	4,757,624	4,140,027
Cumulative eligible capital	**9,512**	10,349	11,128
Debt issue costs	**-**	657	1,386
Total deferred income tax assets	**4,351,651**	4,768,630	4,152,541
Deferred income tax liabilities:			
Property, plant and equipment	**4,798,456**	5,289,273	4,685,315
Total deferred income tax liabilities	**4,798,456**	5,289,273	4,685,315
Net deferred income tax liabilities	**446,805**	520,643	532,774
Effective tax rate	**13.0%**	13.0%	13.0%
Deferred income taxes payable	**58,085**	67,684	69,261

The Company's effective tax rate approximates 13% on the first $500,000 of active business income earned in Saskatchewan. The tax rate is between 27% and 30% for active business in excess of this amount.

The difference between the effective tax rate and actual income tax rates is insignificant; therefore a reconciliation has not been provided.

17. Capital management

The Company's primary objectives when managing capital is to ensure that sufficient capital reserves are maintained to facilitate the Company's ability to continue as a going concern, so that it can continue to provide returns for the shareholders and benefits for other stakeholders through the provision of grain handling services, and also to allow the Company to take advantage of business opportunities that are connected to its core business. The Company considers debt and shareholders' equity in the definition of capital.

The capital structure of the Company is as follows:

	December 31 2014	October 31 2013	November 1 2012
Bank indebtedness	**217,000**	-	-
Current portion of long-term debt	**197,124**	50,352	-
Long-term debt	**688,157**	171,881	-
Share capital	**497,673**	497,673	875,854
Retained earnings	**4,615,524**	4,357,706	3,774,233

The Company sets the amount of capital in proportion to risk and manages the capital structure and makes adjustments to it in light of changes to economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of distributions to shareholders or sell assets to reduce debt.

The Company does not establish quantitative return on capital criteria for management, but rather promotes goals for sustainable operations.

The Company is bound by certain external imposed covenants on its long-term debt. These covenants place restrictions on total debt based on the Company's current ratios, earnings before interest, depreciation and amortization, set minimum levels for debt service coverage and a number of operating restrictions. During the period ended December 31, 2014, the Company complied with the capital requirements.

Within the 2015 fiscal period, management does not expect its activities to be constrained by any of its debt covenants.
